

The Well WorkStation – Assembly Instructions

Although our standing desk converter is very easy to set up and pack away, we have created some basic instructions to help you if you get stuck.

1.

Lay the main stand on a flat surface with the logo facing down.

2.

Take the foot and place it into the 2 slots in the main stand, it may be stiff to start with so just give it a wriggle.

3.

Stand the unit upright and place the extra support bracket underneath the main stand if required (this prevents the unit toppling forwards when using a laptop low down).

If you need help just get in touch via email:

industrialfurnitureart@outlook.com

4.

Take your required shelf and slide it over the top of the main stand, tilt it upwards slightly and it will slide down easier.

5.

Add any other shelves the same way.

6.

Enjoy your beautiful standing desk converter!
